

# Placeable Calculations

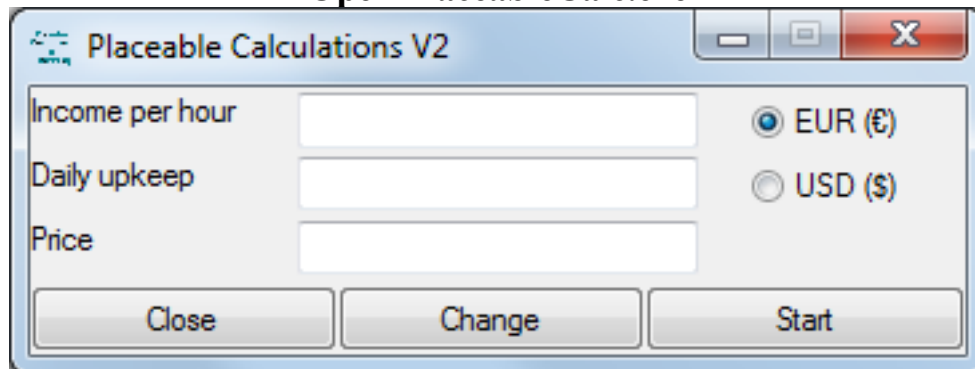

by TheMrSeq

## How to use

Note: You can always exit with pressing 'ESC' on your keyboard!

### 1. Make your own Calculation.

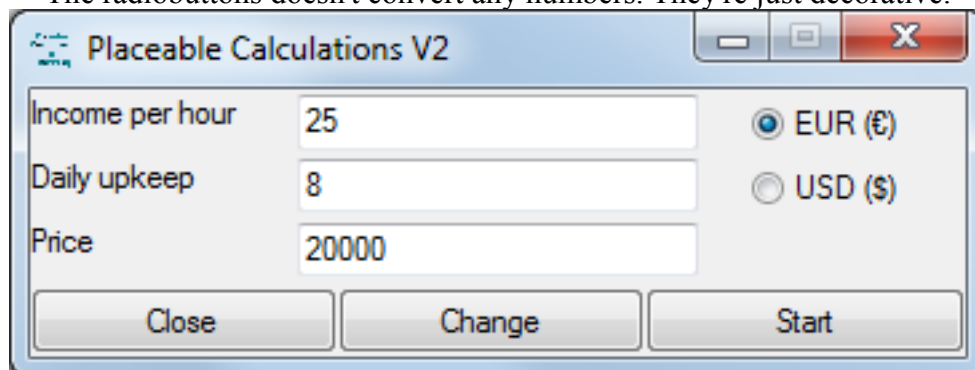

#### **Open PlaceableCalc.exe**

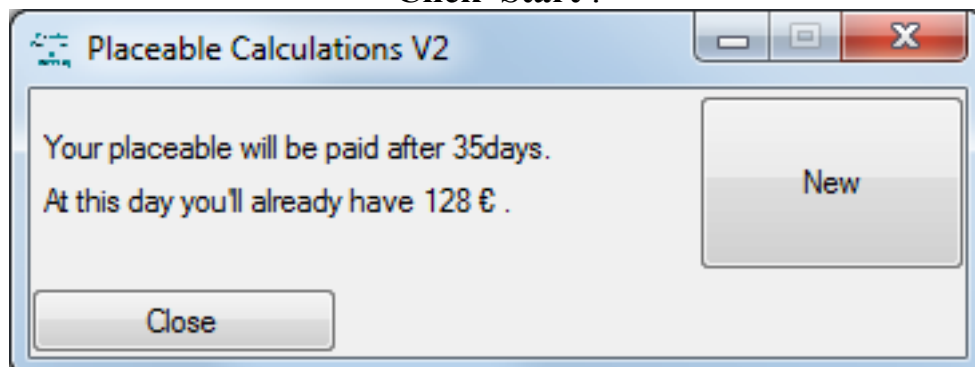

#### **Fill the Boxes**

with your numbers (you can find them mostly inside the game)

The radiobuttons doesn't convert any numbers. They're just decorative.

#### **Click 'Start'.**

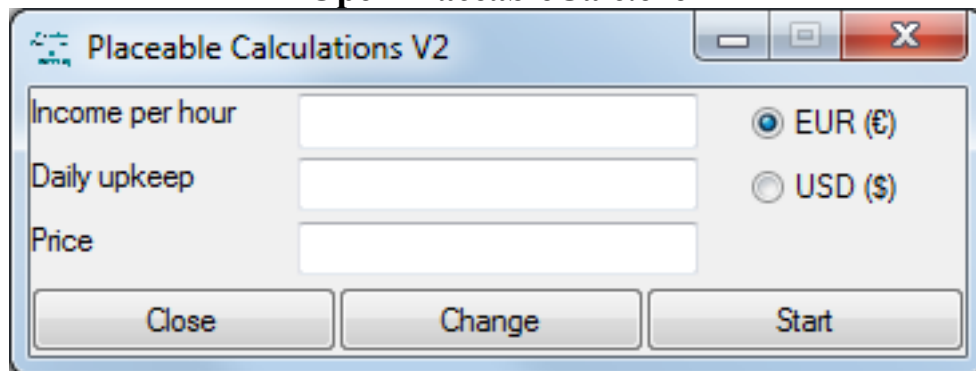

#### **DONE!**

You can make a new calculation by pressing 'New'.

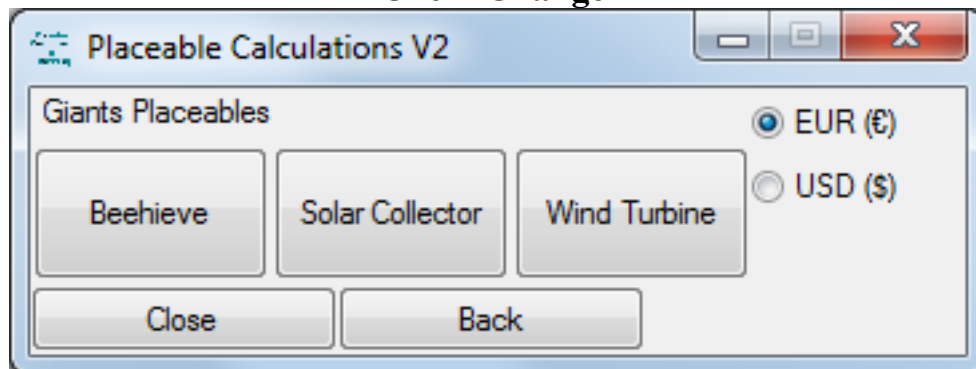

1. Use the calculation for one of Giants placeables.

**Open PlaceableCalc.exe**

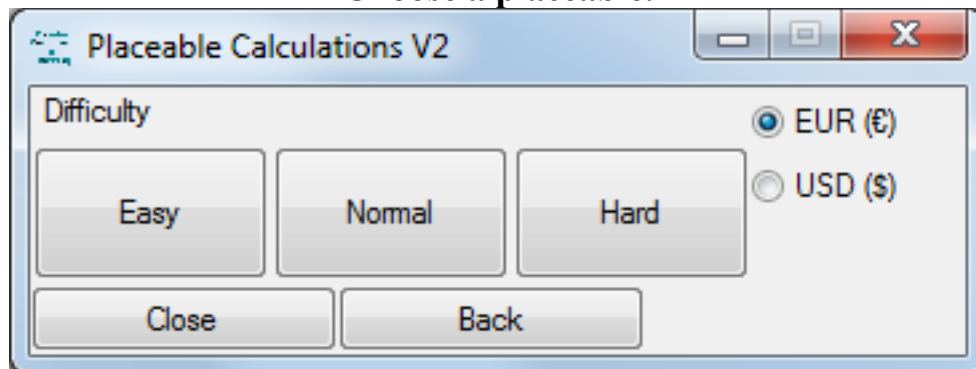

The window titled "Placeable Calculations V2" has a standard Windows title bar with minimize, maximize, and close buttons. It contains three input fields: "Income per hour", "Daily upkeep", and "Price". To the right of these fields are two radio buttons: "EUR (€)" (selected) and "USD (\$)". At the bottom are three buttons: "Close", "Change", and "Start".

**Click 'Change'**

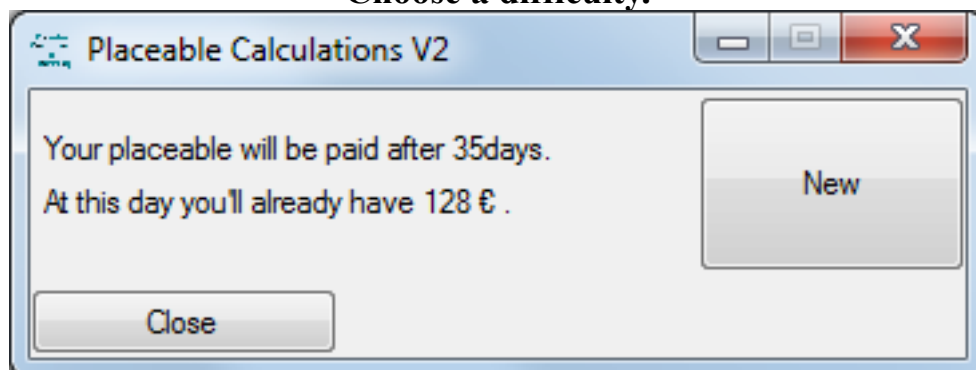

The window now shows the "Giants Placeables" screen. It has the same title bar and currency radio buttons. Below the title bar are three buttons: "Beehive", "Solar Collector", and "Wind Turbine". At the bottom are "Close" and "Back" buttons.

**Choose a placeable.**

The window now shows the "Difficulty" screen. It has the same title bar and currency radio buttons. Below the title bar are three buttons: "Easy", "Normal", and "Hard". At the bottom are "Close" and "Back" buttons.

**Choose a difficulty.**

The window now shows the result screen. It has the same title bar. The main text area contains: "Your placeable will be paid after 35days." and "At this day you'll already have 128 € .". To the right is a "New" button. At the bottom left is a "Close" button.

**DONE!**
